WORK IN PROGRESS

Girls at the Top of the Class: Classroom Peers and the Gender Gap in STEM
Using administrative data in Peru, I study whether having more girls among the top performers of a Grade 2 classroom narrows the gender gap in STEM choices at university.

Who Stays the Course? Early Classroom Rank and Educational Trajectories (*with Saurabh Singhal*)
Following Peruvian students from Grade 2 to university, we show that early classroom rank shapes who stays in school and who applies to university, but not who is admitted.

The Impact of Start Age on School Progression (*with María Pía Basurto, Antonio Campos and Valeria Hoyos*)

Connecting Schools to Reduce Dropout in the Primary–Secondary Transition: Evidence from Peru (*with Juan Francisco Castro*). MSc thesis. Spanish draft.
